Representative Experiences

- ***Global ERP Migrations*** – While working as the Chief Information Officer at Morpho, Mr. Odelson was responsible for multiple ERP migrations, including Oracle, SAP, Microsoft Dynamics, Delteck Costpoint and Sage. Most notable of these migrations, and as part of a divestiture of General Electric Security Divison, Mr. Odelson led the largest Oracle ERP migration to Oracle on Demand. This system had over 12 petabytes of data and supported 65 modules.

- **ERP Consolidation –** As the Chief Information Officer of Safran Identity and Security, Mr. Odelson lead a program to consolidate multiple ERP instances into a unified SAP HANA system. This consolidation encompassed 6 distinct manufacturing entities containing an employee base of more than 8700 people in 57 countries.

- ***Business Process Redesign –*** Facilitated business process re-engineering by using six sigma methodologies, analysis workshops, optimization and visioning sessions to help implement changes in policies, procedures, organization structure and enabling technology to improve the efficiency of the organization's business.
